As a professional China industrial transformers manufacturer and equipped with a famous factory and plant, as well as providing with industrial transformers for sale, welcome to check the process and layout with Hani New Energy and Technology.

Industrial transformers / Industrial power transformer

Main function:

Industrial control transformer is widely used for Voltage change, current change, impedance transformation, isolation, voltage regulator (magnetic saturation transformer), etc. It is a proper voltage rectifier supply system;

It is to minimize the waveform distortion of caused by rectifying system of power grid pollution.

Equipment characteristic:

◆ Electrical performance stability, High degree of dynamic stability
◆ Good thermal stability, overloading ability
◆ Superior performance indicators
◆ Power saving effect is obvious, low noise
◆ To simplify structure, beautiful appearance; Tank adopts the design of seepage prevention of process,
can prevent tank leakage.
